

Ways To Describe Triangles

Angle Sizes

One angle is 90 degrees ●————→ A right angle

One angle is greater than 90 degrees

OR

One angle is larger than a right angle

All angles are less than 90 degrees

OR

All angles are smaller than a right angle

●————→ An obtuse angle

●————→ An acute angle

Side Lengths

All sides have different lengths ●————→ Scalene Triangle

Two sides have the same length ●————→ Isosceles Triangle

All three sides have the same length ●————→ Equilateral Triangle
